

Book Review

The FPeLearning™ System for Education: Systematic Research on Creative Technology Integration into Classroom Practice

Authors: Dale Herold Eberwein (University of Phoenix, School of Advanced Studies SAS Alumni, Coeur d'Alene, Idaho, USA)

Dr. Eberwein's book, "The FPeLearning System for Education" was an awesome read, and quite timely for me as an educator working in an administrative position. I feel Dale's book will be helpful for other administrators and teachers working in the K-12 arena as we are all charged with the responsibility to ensure that our students are technologically savvy and ready to compete globally. This sort of competence begins with teachers receiving the needed professional development regarding creatively integrating technology into the lessons they prepare for their students...Dr. Eberwein spells it all out for us within his book, The FPeLearning System for Education!
